

# T.O. PLASTICS

## OUR COMMITMENT TO ENVIRONMENTAL RESPONSIBILITY

### Manufacturing high quality, made in the USA products with the least environmental impact, is what we do every day.

It makes good sense to operate in this manner and influences everything we do. Our facilities are located in Minnesota, home to the Boundary Waters and the land of 10,000 lakes. We live, work, and play within the bountiful natural resources all around us. We respect and enjoy the environment in our business and everyday personal lives.

### T.O. Plastics thermoforms a wide variety of horticultural containers.

They house, grow, and nurture thriving, living plants destined for wholesale and retail applications. Our products satisfy a broad range of needs that include farming and food crop production, reforestation projects, floriculture research, erosion control, and native plant restoration. Plants we help bring to life beautify our environment.

### Our manufacturing process begins with 100% recycled materials.

All of our resins have already enjoyed a productive life in a variety of applications from industrial to consumer products. They are now ready to be manufactured into the ultimate green use - nurturing a plant from seed to need.

### Our manufacturing process continues with zero waste.

We extrude our own sheet and roll stock from these 100% recycled resins. This roll stock is the material from which we thermoform our products. All scrap by-product produced in this process is immediately routed to a grinder and re-made into more roll stock, and the manufacturing process repeats. This is a 100% closed loop system that produces no plastic scrap waste.

### Our packaging is designed to be as eco-friendly as possible.

Minimal packaging with maximum storage and shipping efficiencies are always utilized. We are constantly re-evaluating and looking for creative solutions by partnering with our logistics partners.

### T.O. Plastics horticultural products are 100% recyclable.

Our containers are made of common easily recycled materials and are stamped with the recycle code to facilitate proper recycling by the end user.

T.O. PLASTICS IS YOUR PARTNER IN SUSTAINABLE BUSINESS PRACTICES. WE ARE COMMITTED TO CONTINUOUS IMPROVEMENT IN ALL THAT WE DO!
