

PLUG TRAYS

UNIFORM GROWTH & QUALITY

Our plug trays offer precisely centered and punched drain holes that offer automation compatibility to help you achieve production efficiencies and higher yields. Choose from square, round, star, or hex shaped cells, a variety of depths, and your preferred trim format (standard, true or no trim). Some trays also available as open bottom.

Top Surface Ventilation Provides Upward Air Flow, Reducing Moisture and Spread of Disease (*Non-Vented Also Available*)

V-Shaped Ribs from Top to Bottom to Prevent Root Wrapping that Helps Develop Strong Roots & Good Water Management

Faster & More Reliable Propagation

Bottom Feet Available for Increased Drainage
