

SQUARE POT PACKAGING IMPROVEMENT

New Box Style, Same Great Product

We are excited to share that we have implemented an improved packaging solution for our line of square plant pots. Over the next few weeks we will be transitioning to a thicker box with an easy to open perforated seam and a new stacking formation. Here are the benefits you can expect:

- Thicker boxes for extra overall part protection
- Perforation for easy and safe unloading
- New stacking formation to prevent part compression and enhance press-filling capability

We pride ourselves on quality, both in our products and our customer experience. This is one initiative we hope elevates both.

USER-FRIENDLY PACKAGING

When you receive your new packaging, it's as easy as 1-2-3-4! Instructional video also available on our website: <https://www.toplastics.com/blog/square-pot-packaging-improvement>

1. Find the perforated seam, marked "Pull to Open"
2. Tear perforated flap
3. Unload Parts
4. Press Fill & Plant

TRANSITION SCHEDULE

We will be transitioning to this new packaging solution one product at a time, beginning in early March. As you order square plant pots, please expect to see this new packaging as part or all of your shipment. Here is the initial transition order, per product:

| PRODUCT | CODE |
|---------|---|
| SVD-250 | 700000C, 700002C, 700003C, 700004C, 700005C, 700006C, 700007C, 700008C, 700009C |
| SVD-450 | 700051C-HTP |

Please reach out to your sales rep with any questions or feedback about our new packaging:
